@madhawk4 where should I go in Colorado for a trip to ski and all that?

Where to stay in CO for long girls weekend?
Nov 21, 2015, 11:00 PM
Hi-
We are flying into Denver, Co in May for a girls weekend trip for a 40th birthday. We want to hike/bike during the day and enjoy great food/drinks at night. May do some yoga and spa also. We love adventure and great music at night. We want to have the mountain experience during the day and more of a city experience at night.
We would prefer to not drive much over an hour from Denver. What would you recommend? Boulder, Colorado Springs, Breckenridge, or Vail?

An aerial photograph of a vast, snow-covered field. The field is marked with a grid of tracks or furrows, likely from a plow or similar agricultural machinery, creating a series of parallel lines that intersect at various points. The snow is bright white, and the tracks are a slightly darker shade, providing a clear visual structure to the otherwise flat landscape. The perspective is from a high angle, looking down on the field.

PROJECT PLAN/COSTS

PROJECT APPROACH: OVERVIEW

We will start fast, assign ownership teams, and quickly assess how to get the finish line. The total project will develop through five major phases:

DISCOVER

We interview stakeholders, audit the current and competitive landscapes, and surface insights that ladder up to the business objectives. We synthesize our learnings and confirm alignment. This is the beginning of our holistic approach and a critical phase in which to align.

DEFINE

We map customer journeys, prototype our thoughts, and propose site structure alongside design frameworks. A Brief is created to inform subsequent phases and hold us accountable. Defined project plans, laddering up to the larger roadmap, are created, reviewed, and shared.

IDEATE

We craft user experience and design concepts that can be validated through usability testing initiatives.

DESIGN

We visualize the recommendations of previous phases at the template and page levels, confirm technical parameters, secure assets, and annotate functional specs for hand off.

DEPLOY

We advise during pre-production to ensure a seamless handoff and assist in post-production until properties are deemed stable.

PROJECT APPROACH: INITIAL PHASES

TIME TO COMPLETE: 15—17WEEKS

BUDGET RANGE: \$348,860—383,746

ACTIVITIES

- Prep Stimuli (Design and/or Prototypes)
- Draft Moderator Guide
- Wireframing, including detailed Use Cases for Resort Info, Booking, and Checkout flow
- Look / Feel / Tone Exploration
- Visual Design
- Asset Management
- Content Modeling
- Post Handoff Support

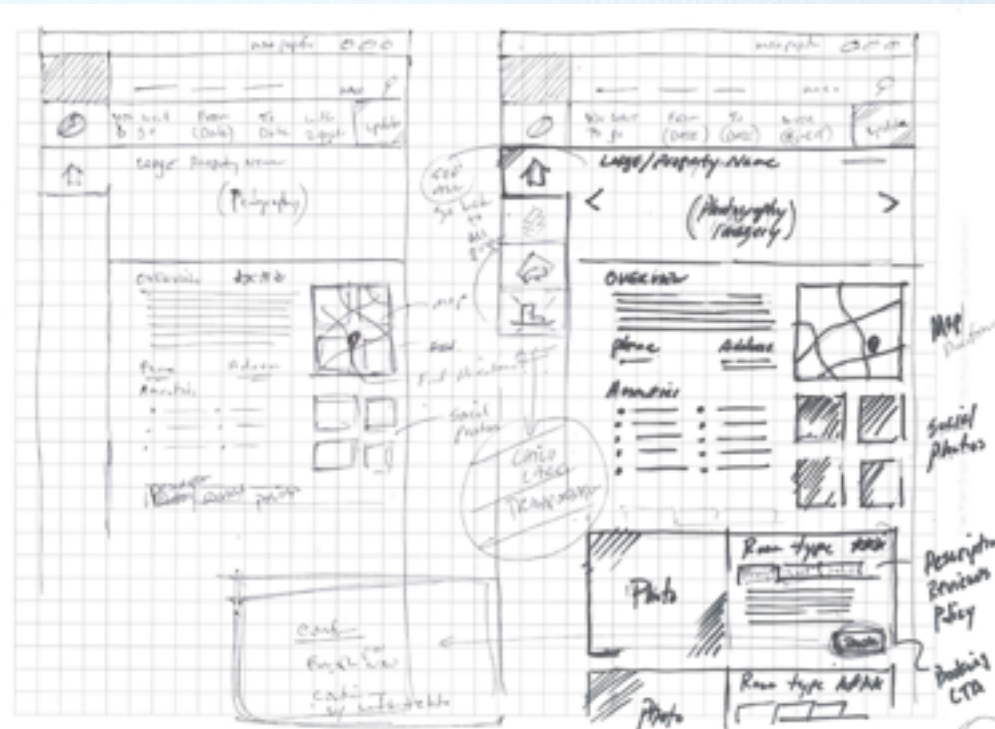

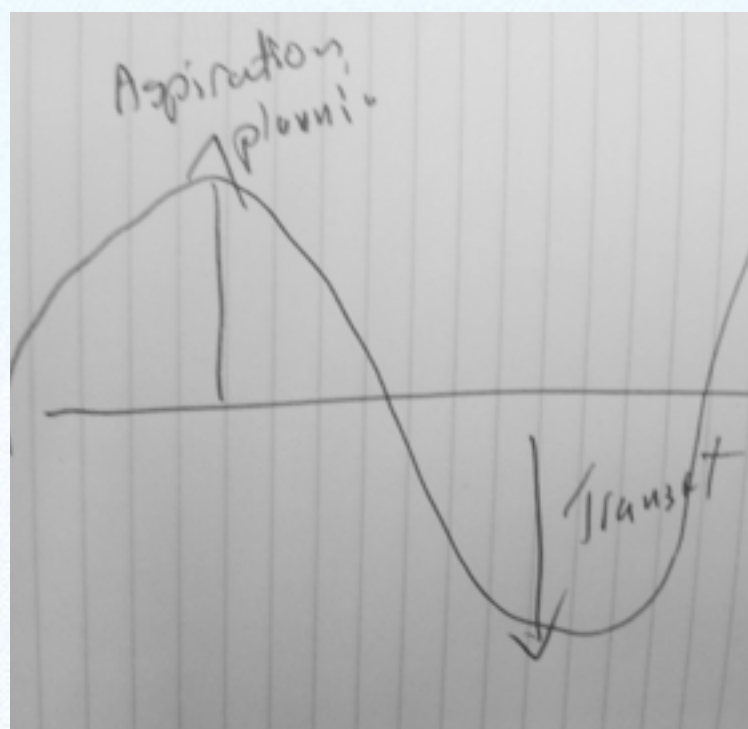

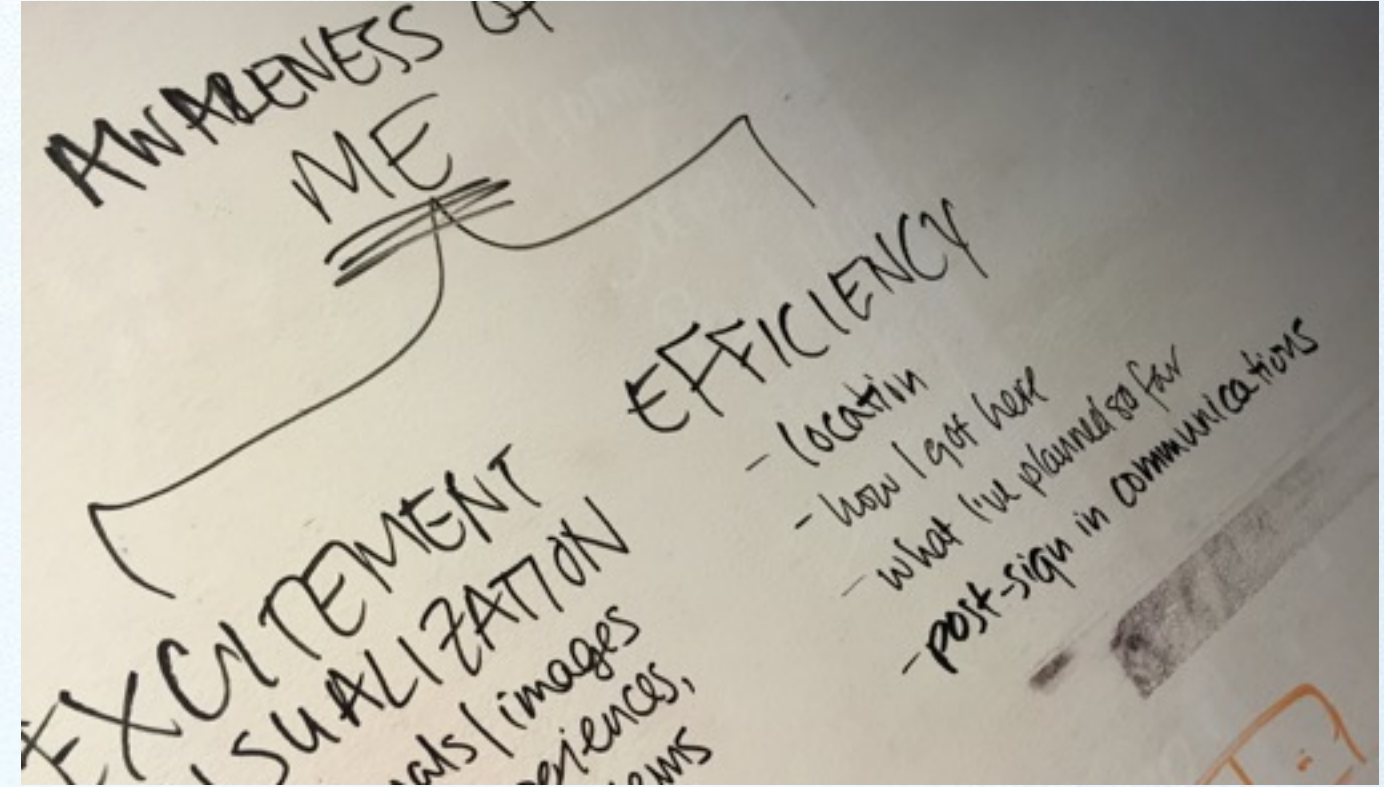

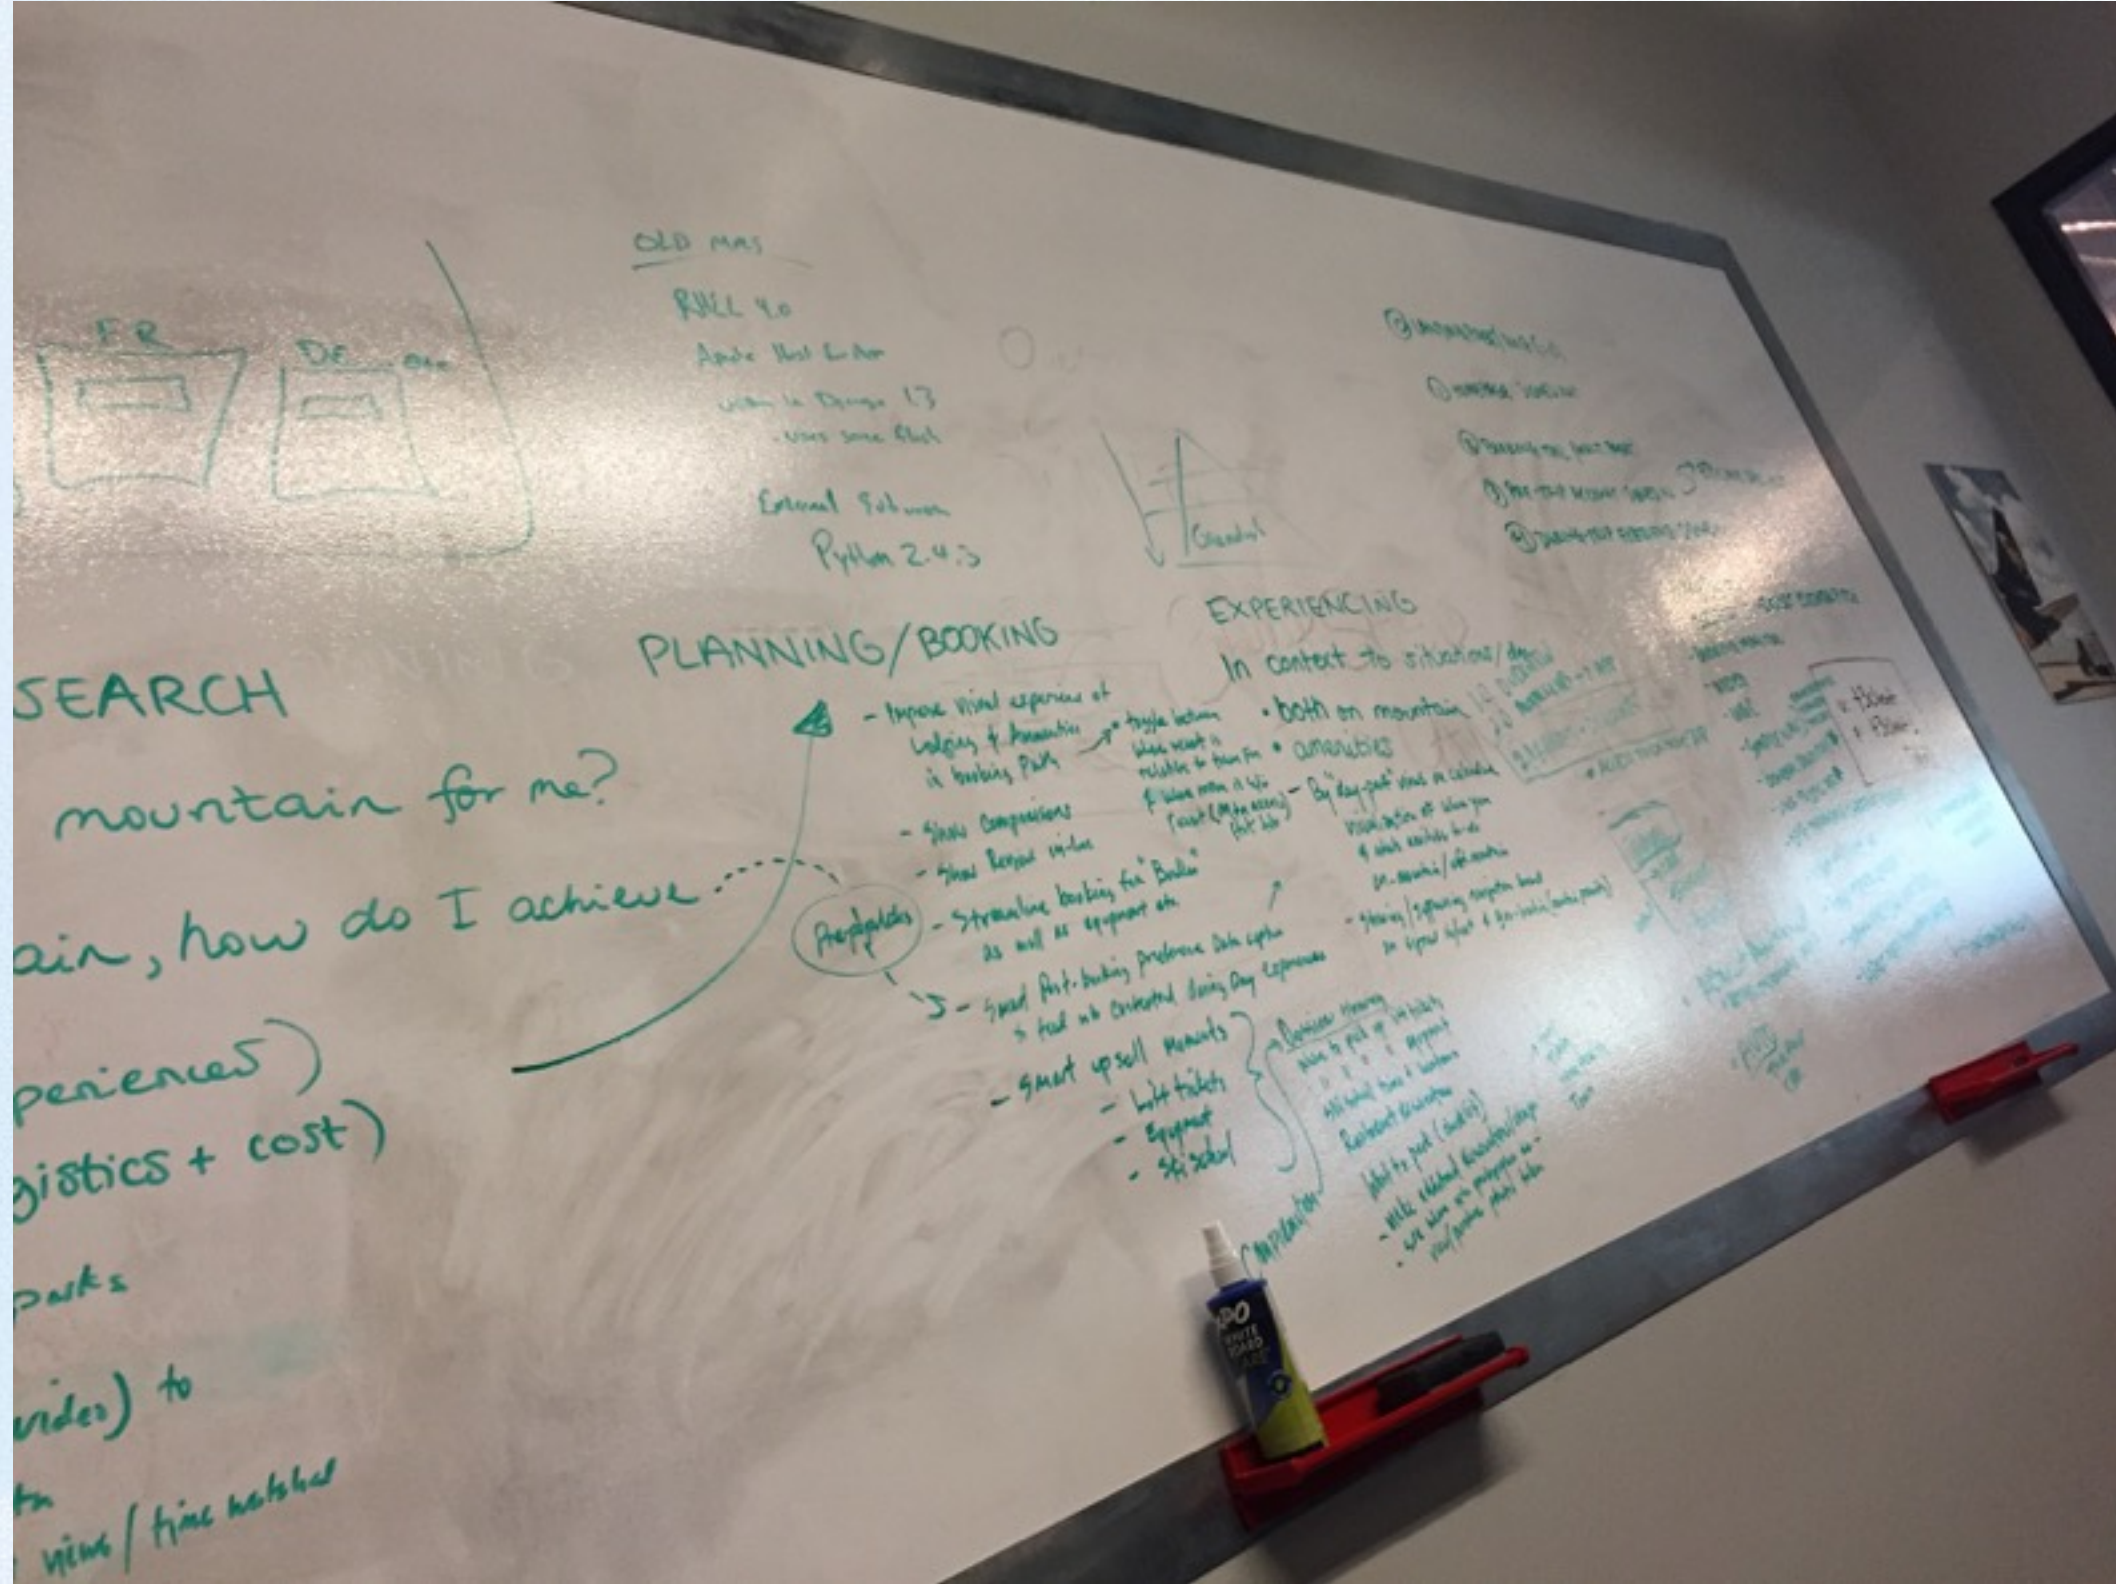

OUTPUTS

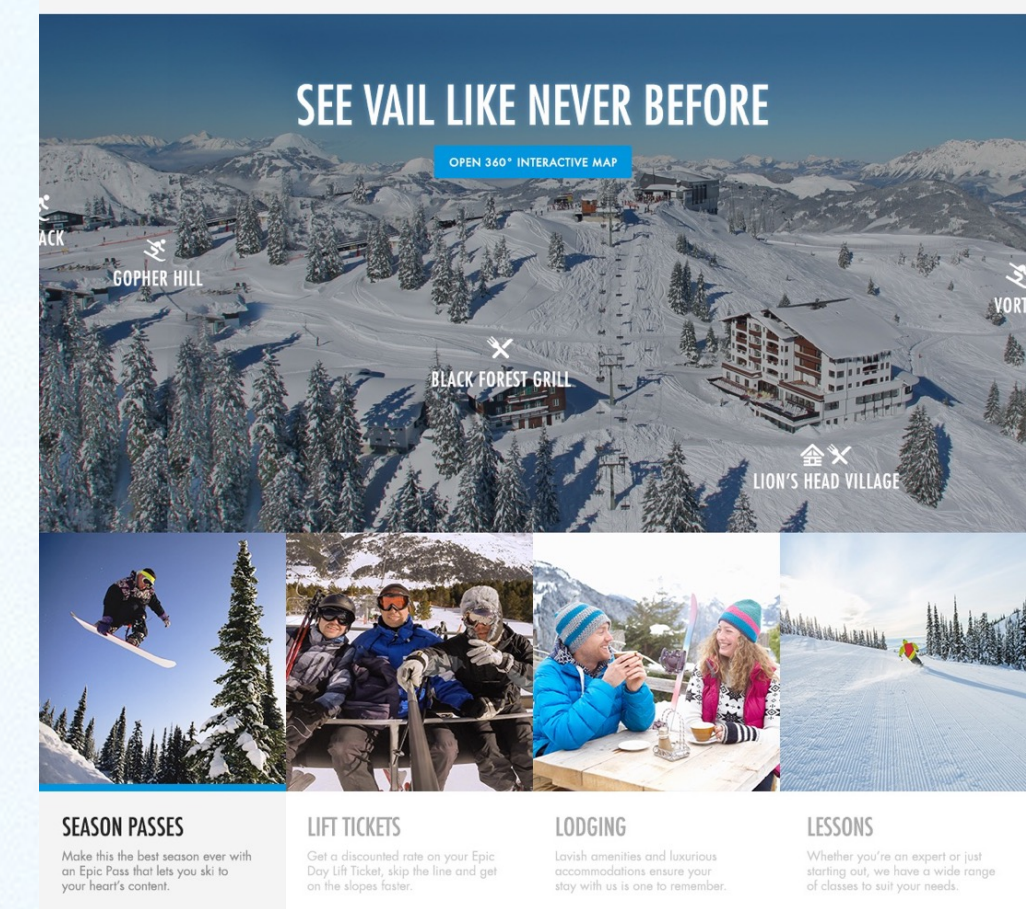

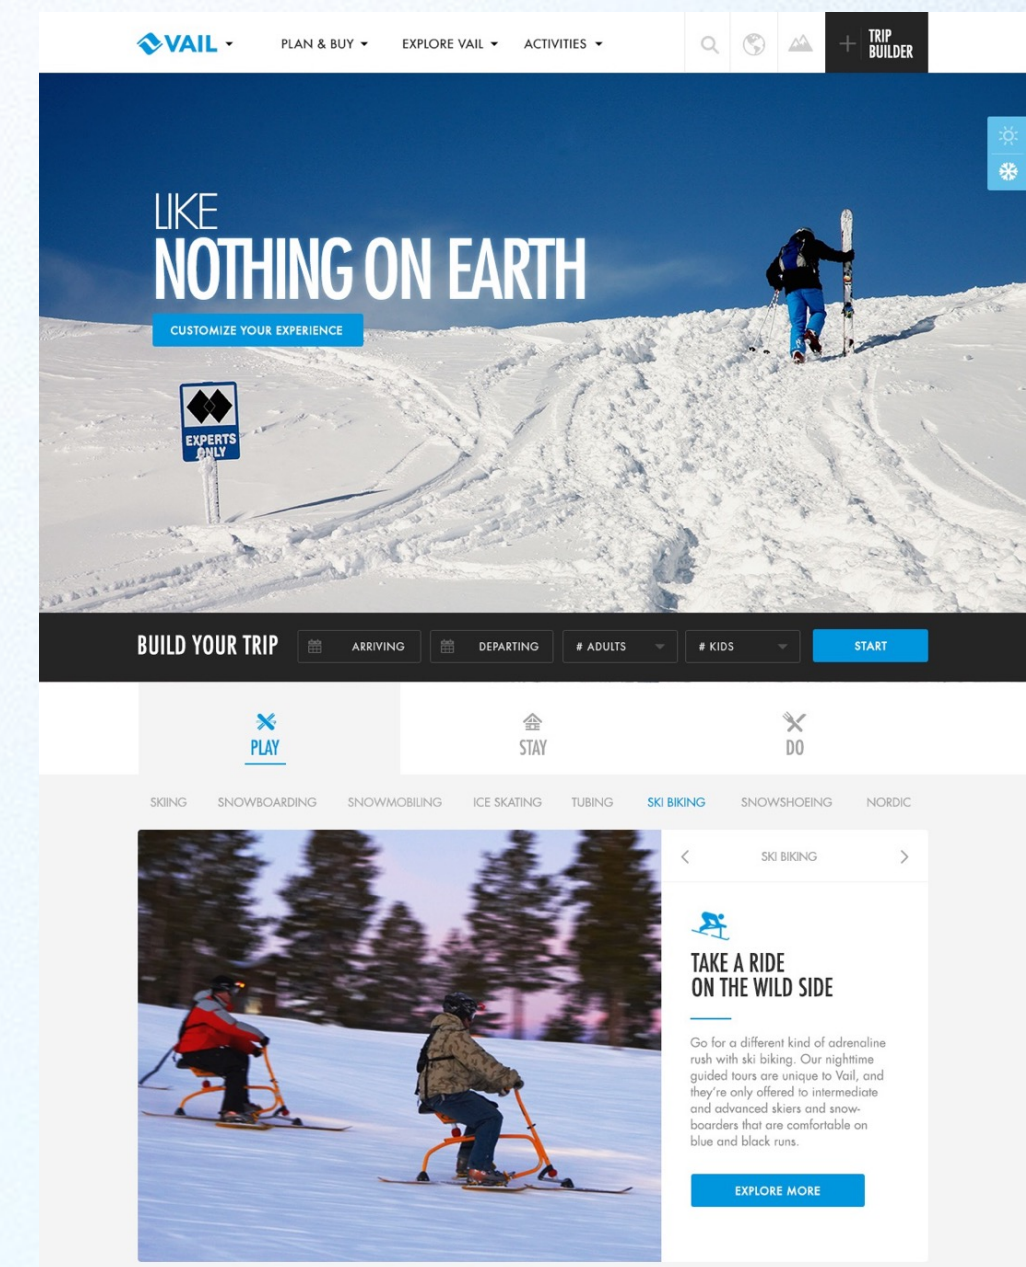

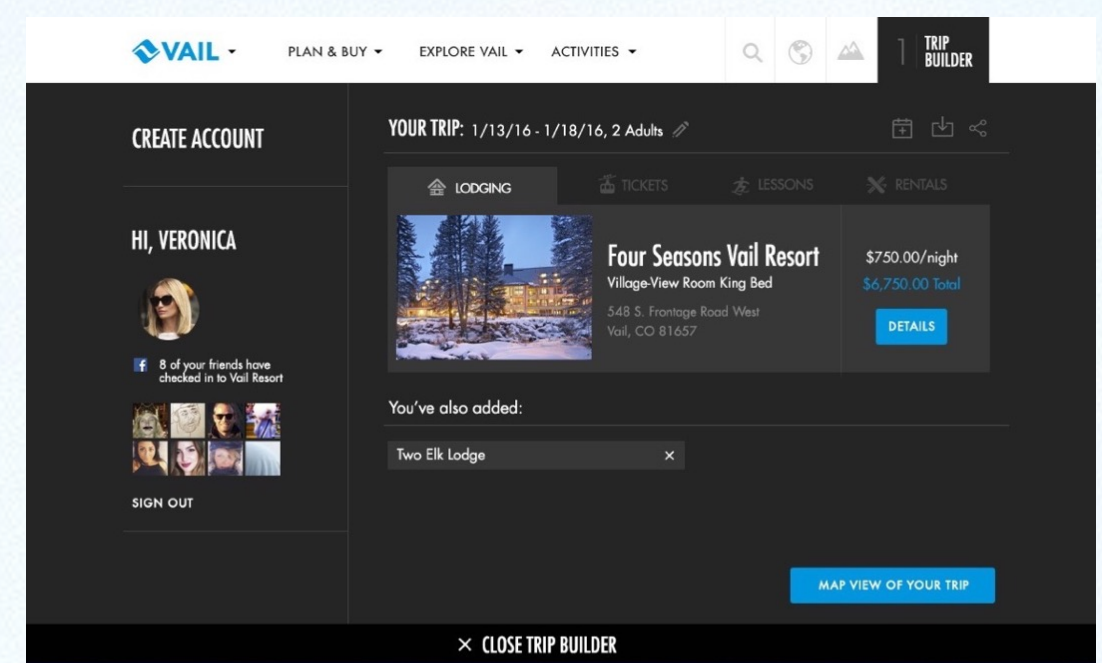

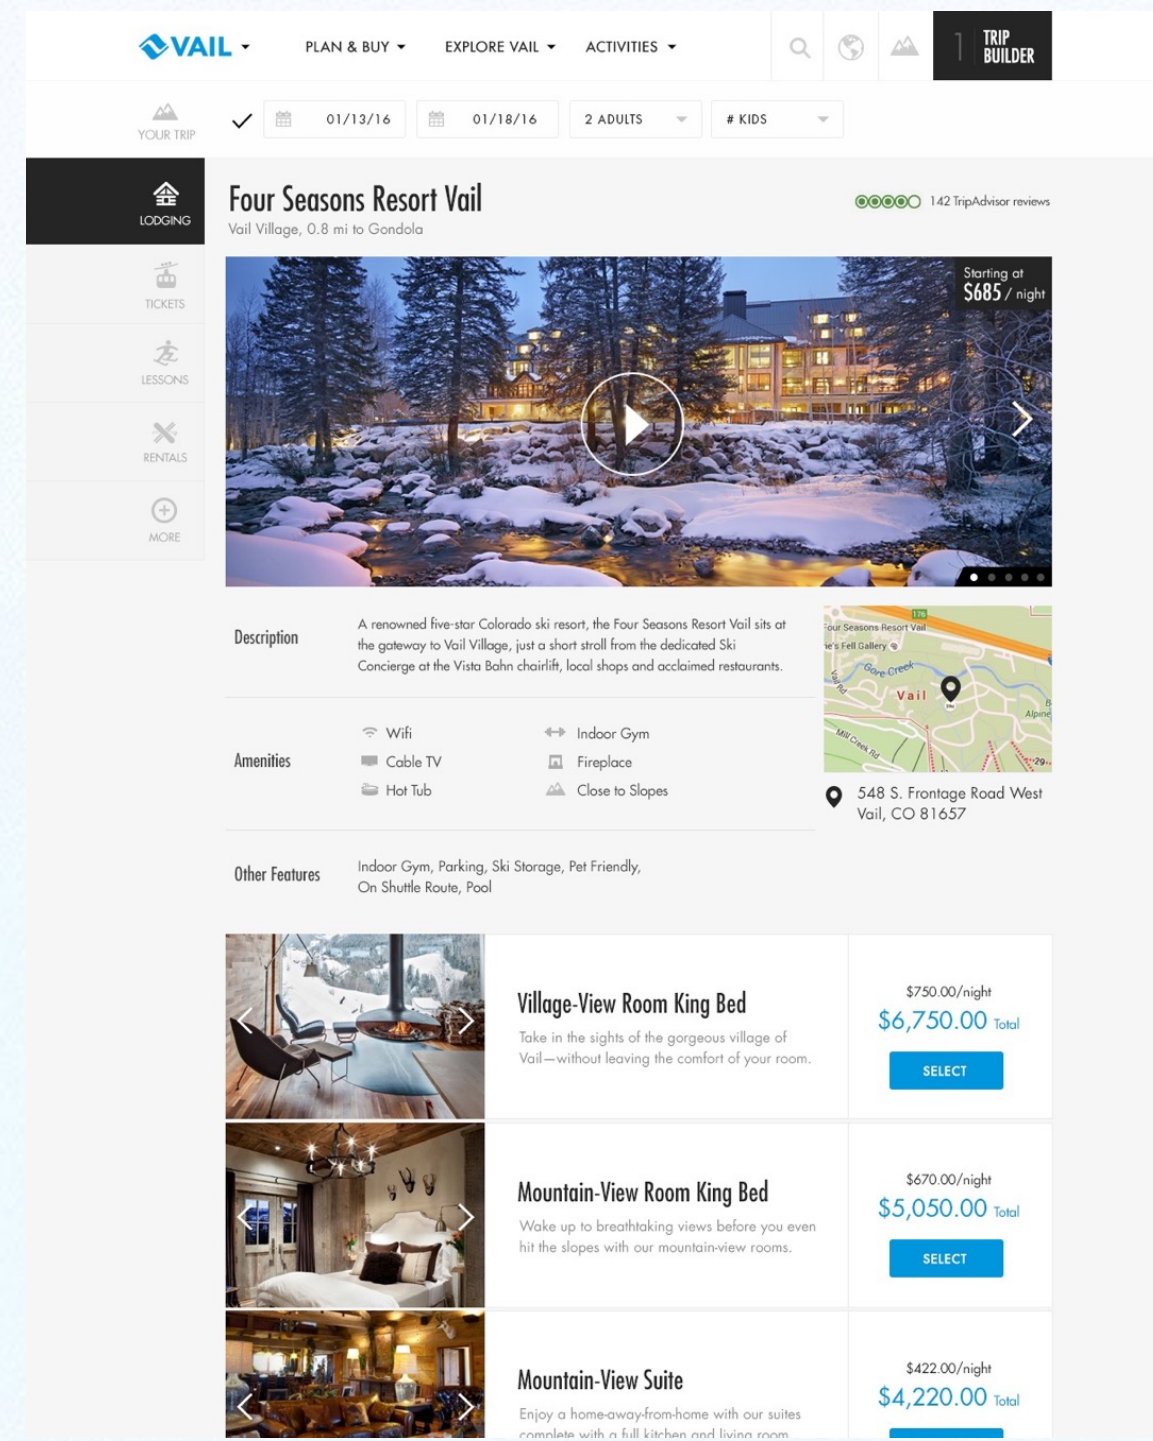

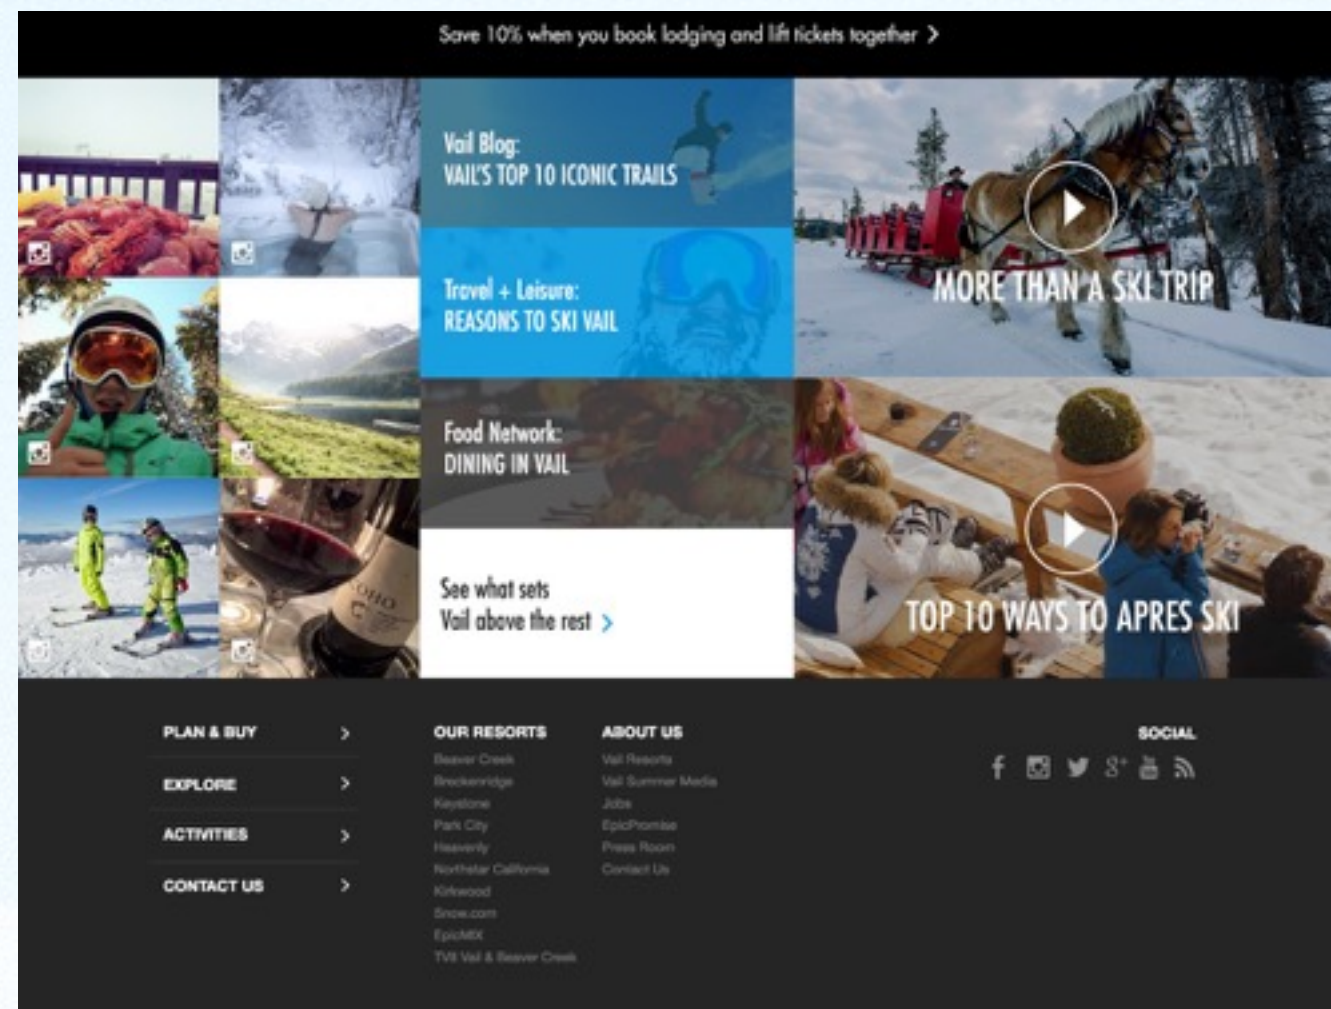

- Testing Stimuli
- Moderator Guide
- Testing Attendance
- Testing Results Synthesis and Recommendations
- Wireframes
- Responsive Design Comps
- Copy Deck
- Content Model for Dynamic Modules
- Annotations / Functional Specs
